Competitor Analysis 2026: SME Fintech in Singapore

Document ID: M03
Department: Marketing
Owner: Daniel Koh, Product Marketing Lead
Version: v1.0
Effective Date: 2026-09-01
Classification: Internal
Compartments: none

1. Scope and method

This analysis covers three competitors most often met by Aspire sales teams in Singapore SME deals during Jan-Sep 2026: LedgerLoop, FlowCard and Brightpay. Data comes from public pricing pages, 41 win/loss interviews and a market survey of 310 SME finance owners. Market share is estimated by share of SME business accounts and cards with a fintech provider in Singapore. All figures are estimates and are Internal use only.

2. Market snapshot

Provider	Est. SME share	Core strength	Weak spot
Aspire	18%	Multi-currency account plus cards plus spend in one	Brand awareness outside Singapore
LedgerLoop	22%	Accounting integrations and bookkeeping bundle	Limited card programme, slow SWIFT
FlowCard	14%	Card-first, high cashback	Account features thin, no FX tools
Brightpay	9%	Low-cost payroll and payables	Weak controls, no corporate cards
Banks and others	37%	Trust, lending	Slow onboarding

3. Pricing comparison

Item	Aspire (Growth)	LedgerLoop	FlowCard	Brightpay
Monthly platform fee	SGD 49	SGD 59	SGD 35	SGD 29
Local transfer (FAST/PayNow)	Free	SGD 0.30	SGD 0.25	Free
SWIFT outgoing	SGD 12	SGD 18	SGD 20	SGD 15
FX margin	0.35%	0.60%	0.80%	0.50%
Card cashback	1% on Scale, cap SGD 2,000/mo	0.5%	1.5% cap SGD 1,000/mo	None

Item	Aspire (Growth)	LedgerLoop	FlowCard	Brightpay
Free virtual cards	20	5	10	0

Aspire is the cheapest of the group on FX and SWIFT at the Growth and Scale tiers. FlowCard has the most aggressive cashback but caps it at SGD 1,000 per month, which hurts firms with card spend above SGD 66,000 per month.

4. Feature comparison

• Multi-currency accounts: Aspire supports 12 currencies; LedgerLoop 6; FlowCard 3; Brightpay 4.

• Spend management: Aspire Spend includes receipt capture and approval flows; LedgerLoop relies on partner apps; FlowCard offers basic limits only.

• Accounting sync: LedgerLoop leads with 14 integrations; Aspire has 8 including Xero and QuickBooks.

• Onboarding speed: Aspire median 2 business days; LedgerLoop 4; FlowCard 3; Brightpay 5.

• Regional presence: Aspire is live in Singapore with VN launch planned; LedgerLoop is Singapore-only; FlowCard has Malaysia.

5. Win and loss patterns

Aspire wins when the customer has cross-border payments above SGD 50,000 per month (win rate 54%) and loses to LedgerLoop when accounting bundling is the primary buying criterion (win rate 29%). The top stated reasons for loss were accounting integrations (31%), existing bank relationship (24%) and cashback rate (17%).

6. Strategic implications

• Lead sales messaging on FX and SWIFT savings, with a calculator for firms above SGD 50,000 monthly cross-border volume.

• Close the integration gap: target 12 accounting integrations by Q2 2027 in coordination with Product.

• Position Scale-tier cashback (1%, up to SGD 2,000/month) against FlowCard for high-spend firms.

• Watch Brightpay: a rumoured card launch in Q1 2027 could pressure the Starter tier.

• Use the Vietnam launch as a differentiator, since no named competitor has a regional card proposition.

7. Review cadence

Product Marketing refreshes this analysis each quarter. The next update is due in January 2027. Account managers should log competitor encounters in the CRM field 'Competitor Seen' to improve win/loss data.
