Who we are

Aspire Demo Pte Ltd is a Singapore-headquartered financial technology company serving small and medium enterprises across Southeast Asia. We provide multi-currency business accounts, corporate cards, spend management software and automated compliance onboarding, all delivered on our proprietary platform, Aspire Core. Founded in Singapore, the company today employs approximately 420 people across three offices: Singapore (headquarters), Ho Chi Minh City and Jakarta.

Our mission is simple: give every growing business the financial tools that used to be reserved for large corporates, with the safety and transparency that regulators and customers expect. We operate under the supervision of the Monetary Authority of Singapore (MAS) and hold our customers' data to the standards of the Personal Data Protection Act (PDPA).

What we offer

• Business Accounts: multi-currency accounts with local SGD collection through PayNow and FAST, and low-cost cross-border transfers to more than 30 markets.

• Corporate Cards: physical and virtual cards for employees, with per-card limits, merchant category controls and instant freeze from the mobile app.

• Spend Management: approval workflows, receipt capture, expense categorisation and direct export to popular accounting packages.

• Onboarding and KYC: digital identity verification using MyInfo and Corppass where available, with human compliance review for higher-risk applicants.

• Customer Support: live chat and ticket support through our SupportDesk, available during business hours 9:00-18:00 Singapore time (SGT) on working days.

Our values

Value	What it means day to day
Customer first	We measure ourselves on how quickly a business can open an account and get paid.
Trust by design	Security, privacy and compliance are built into every product from the first sketch.
Own the outcome	Teams are accountable end-to-end, from build to support.
Be plain-spoken	We write and speak clearly, to customers, regulators and each other.

Our people and locations

Aspire's workforce is organised into product and engineering, risk and compliance, customer operations, finance, people and culture, marketing, and sales and account management. The Singapore headquarters houses leadership, compliance and the core engineering teams. The Ho Chi Minh City office focuses on engineering, customer support and the Vietnam card programme. The Jakarta office leads business development and local-language support for Indonesian customers. Full office details and public holiday calendars are published on the intranet.

Safety and governance

Every Aspire customer account is subject to risk-based customer due diligence. We screen against global sanctions lists, monitor transactions for suspicious activity and report to the authorities as required by Singapore law. Our staff complete mandatory compliance training every year. Customer data is classified and protected according to a four-level data classification scheme, and access to sensitive information is granted on a need-to-know basis.

Working with us

Prospective customers can apply online and typically complete onboarding within a few working days, subject to document completeness and compliance review. Partners and vendors may contact our procurement team through the Aspire Hub partner channel. Media enquiries should be directed to the Marketing team. This brochure is public and intended for general information only; it does not constitute an offer or financial advice.
